Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1-2 (Canceled)
- 3. (Currently amended) A method for producing intersia designs with a <u>medium-or large-diameter</u> circular knitting machine, consisting in <u>the steps of:</u>
- -moving so as to knit each set of needles at the eorresponding-respective feed or drop by actuating the needle cylinder with an alternating rotary motion about its own axis, with an extent of oscillation that is sufficient to produce [[the]] transit of all the needles moved so as to knit of each set of needles at the eorresponding-respective feed, forming knitting both in the forward rotation and in the return rotation of the needle cylinder, at least the needles located at the ends of each set of needles being moved so as to knit both at the feed or drop that is correlated with the set of needles to which it belongs and at the feed that is correlated with [[the]] a contiguous set of needles in order to mutually join the various regions of the design.
- 4. (Currently amended) The method according to claim 3, wherein the number of needles of each set of needles is changed row by row depending on [[the]] a configuration of [[the]] respective regions of the design to be provided.
